What influences interest_component to

Increase

 ?

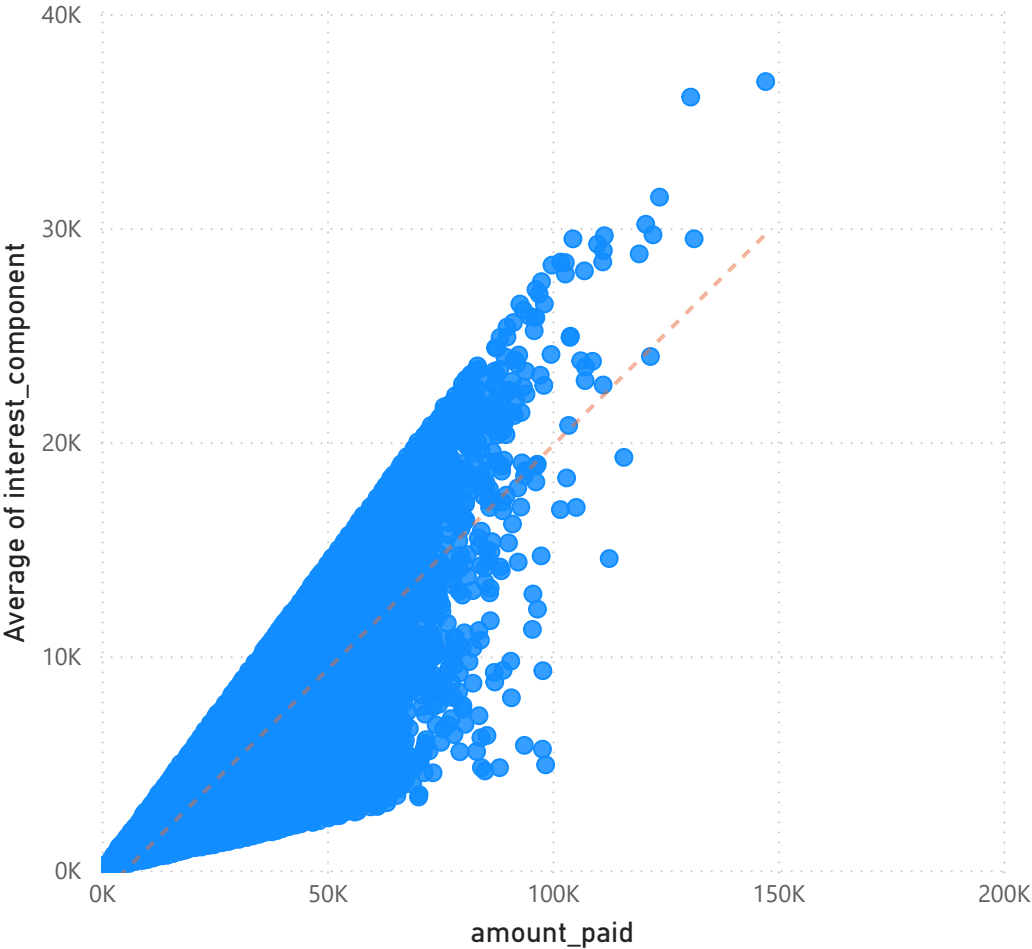

When...

Sum of amount_paid goes up 9660.89

....the average of interest_component increases by

1.89K

← On average when Sum of amount_paid increases, interest_component also increases.

BANK PERFORMANCE ANALYTICS DASHBOARD

Real-time Banking Insights & Performance Analytics

This Bank Performance Analytics Dashboard provides a comprehensive view of banking operations by integrating customer, account, transaction, loan, card, branch, employee, fraud, and support analytics into a single interactive Power BI solution. The dashboard enables stakeholders to monitor key performance indicators, identify business trends, evaluate operational efficiency, detect fraud risks, and analyze customer behavior through dynamic visualizations. By transforming large volumes of banking data into actionable information, this solution supports faster, data-driven decision-making, improves customer service, strengthens risk management, and enhances overall business performance.
